## Create PDF Files For Free

The average home computer does not include the expensive (\$300-\$700) Adobe Acrobat software that is required to create PDF files. What many people may not know is that they can create PDF files for free by using one of many free downloadable software choices on the internet.

The one that I use is CutePDF Writer. It is free software not a trial version. This is very easy to use software that can turn any printable document, such as a Word or Excel document, into a PDF file with the click of a button. After downloading the software you install it as if it were a printer. When you are ready to create your PDF file you simply click "File", "Print", choose "CutePDF Writer" as your printer then it will ask you where on your computer you would like to save the file. It can't get any easier than that!

Although there are other PDF software options to choose from, I prefer CutePDF Writer for its simplicity.

You can download your copy [here](#).

## Get Great Deals Online

Why pay retail prices when you don't have to? There are countless websites that are meant to save you money. Many deal websites are secure, easy, and fun to use. There are sites that just have great deals to purchase outright and some that you bid on items. Other sites like Groupon.com allow you to purchase gift cards at local stores and restaurants for steep discounts. The catch on this site is that they generally have deals that are good for one day only. I do not recommend that shopaholics visit any of these sites; they make shopping way too easy.

Here is a list of deal shopping websites:

- <http://www.groupon.com>
- <http://www.dealoftheday.com>
- <http://www.doozyofadeal.com>
- <http://www.dodtracker.com>
- <http://www.techbargains.com>

You can find many more by typing "deal websites" in to Google.com.

## Why FCR?

- First Choice since 1986
- First Choice for Reliable Equipment
- First Choice for Reliable Customer Service
- First Choice for Reliable Delivery
- First Choice for Competitive Pricing
